Special Census Data Products For the 2000 Decade

Once data collection, processing, and tabulation are complete, the governmental unit receives **certified population and housing unit counts** for the entire jurisdiction or part jurisdiction, as defined at the beginning of the Special Census process. Certified counts are communicated to the jurisdiction through a signed letter from the Director of the U.S. Census Bureau. Certified counts can be used by the jurisdiction for any purpose provided for through law, as specified in United States Code, Title 13, IV-196.

Additional data products provided to the jurisdiction include the following:

Population and housing counts by census block

Population Profile of Detailed Characteristics (DP-1) for the Special Census Entity and nonzero population and housing census tracts or census tract parts, referred to as "Demographic Profiles"

Detailed Characteristics by specified summary levels

Jurisdictions will receive detailed race and ethnic tabulations, if they have 5,000 persons or more and include at least 3 census tracts or census tract parts. If the jurisdiction's Special Census does not meet both requirements, the DP-1 and the detailed characteristics file will only be produced for the entity and its census tracts or census tract parts with 100 people or more, and detailed Asian (*Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, and Other Asian*), detailed Native Hawaiian and Other Pacific Islander (*Native Hawaiian, Guamanian or Chamorro, Samoan, and Other Pacific Islander*), and detailed Hispanic (*Mexican, Puerto Rican, Cuban, and Other Hispanic or Latino*) will be suppressed and summary data provided for Asian, Native Hawaiian and Other Pacific Islander, and Hispanic or Latino.

Population and Housing Counts by Census Block (ASCII and Excel)

Population and housing unit counts are provided at the block level. Data is provided in both Excel and ASCII format.

The ASCII file includes identical population and housing unit counts provided in the Excel worksheet and uses the following file layout.

Beg	End	Field
---	---	---
1	2	FIPS state code
3	5	FIPS county code
6	10	FIPS county subdivision code
11	15	FIPS place code
16	21	Census tract code (including suffix)
22	25	Block code
26	27	Block suffix
28	36	Population count
37	45	Housing count

The Excel format looks like the following example:

Block Counts for Montgomery village, Illinois Special Census September 6, 2002

Population Profile of Detailed Characteristics (DP-1) for the Special Census Entity and Nonzero Population and Housing Census Tracts or Census Tract Parts (Excel), Referred to as "Demographic Profiles"

The jurisdiction will receive an Excel worksheet that includes a demographic profile (DP-1) for the jurisdiction as a whole and for each tract or part tract within the area enumerated. The labels at the bottom of each worksheet include standard decennial summary level codes, FIPS state code, FIPS county code (unique within state), the FIPS entity code (unique within state), or census tract number (unique within county). The codes identify the minimal combination of geographic codes to identify the geographic data to which the data apply.

Examples:

160 - 17 - 50218

160 is the Census Bureau standard state-place summary level
17 is the FIPS state code for Illinois
50218 is the FIPS entity code for Montgomery village, Illinois

140 - 17089 - 854502

140 is the standard summary level code for a state-county-census tract
17 is the FIPS state code for Illinois
089 is the FIPS county code for Kane County
854502 is the census tract number, with two decimal places implied, such that the census tract would read as 8540.02

140 - 17093 - 890201

Same format as above, with the FIPS county code (093) representing the Kendall County part of the city within census tract 8902.01.

The Demographic Profile (DP-1) Excel spreadsheet looks like the following example:
